DIGITAL BILLBOARDS

We can make digital billboards that are beautifully designed to win the attention you deserve. Give your customers a digital billboard built specifically for their business.

*Digital Billboards signs
are designed and supported in the USA.*

As the world is advancing, we continue to improve in areas whereas in designing it comes as to how we utilize digital signage for Business.

OUTDOOR LED SIGNS

Outdoor Digital LED signs provide Rugged Durability

Sometimes Mother Nature is out to get you, which is why our high quality Outdoor Digital Signs are fully equipped with armor against the elements. Its Weather Proof Line-X stops rain and wind in its tracks, keeping your sign's interior nice and dry—and the exterior glowing bright.

There's nothing "average" here. High quality outdoor Digital signs shine brighter and last longer. Its power supply is the best available(MW), both energy-efficient and durable. Its solid state control system offers unparalleled stability and reliability. And, the cooling system lets Premier withstand even scorching summer heat.

Maintain and repair easy. Other LED Digital signs often look like a complete mess once you get under the hood, but not this one. Our modules are easy replace, weather-proof, and built to make your life easy.

Here's the deal—brighter signs make happier businesses. But some signs are TOO bright, making their message a blurry mess. Our signs offers the best of both worlds, with high-contrast, super-crisp displays that shout your message loud and clear.

Exterior Advertising

Take inspiration from the large scale video walls in Times Square for exterior advertising. Your options are endless:

Display a larger-than-life ad on the side of a tall building.

Add screens to the side of your building and rent them out as ad space, solo or all screens at once—hourly, daily, weekly, monthly, or alternating at peak and non-peak times of the day.

Your restaurant could use each screen to feature a variety of delicious dishes. Feature a dress and show it on different models of varying body types.

Everyone's needs are different. Choose from 3.91MM to 10 MM pixel pitch. Create the right size, quickly and easily. Our FastLocks allow you to quickly Unparalleled Flexibility: Choose the Right Resolution assembly and build the display you need. Regardless of pitch(for outdoor moveable signs),

- ***Two standard messages available: “Cash” & “Credit”.***
- ***Customization signs available.***
- ***Available in Red, White, Amber or Green LEDs***

Large Indoor LED Video Wall

From Large Indoor LED Video Wall, to entertainment, to advertising, SMD is our ultra high resolution indoor LED display perfectly crafted to make your event or business shine.

Whether they take up an entire wall or the feature focal point in a lobby, conference room, or retail location—video walls are impossible to ignore. While impressive, you may be overwhelmed trying to decide how your business would utilize one. Here are many ideas that can be used as inspiration for a variety of industries.

If you sell a large product, such as Houses, Cars, Boats, or Furniture consider using your multi-screen display to create a Big-size or near to cover your whole wall for led sign display. Even if a customer is in-store and can view your product in-person, video provides you the opportunity to

provide a 360-degree view. You can strategically zoom in on specialty features such as the dashboard of a car, the cabin of a boat, and the hidden compartments in your furniture. You can also highlight customizable upgrades for cars and boats. Or what the same couch looks like in a variety of upholstery options and in a variety of interior design options.

If you rent or sell real estate or want to highlight the amenities of your business, school, spa, or hotel—use your video wall to create a virtual tour. This could be the walkthrough of a beautifully staged home, the common areas of a rental community, different hotel rooms, or the treatment rooms in your spa. Your video will convey the look and feel of your featured spaces and is an excellent way to upsell.

For example, a video wall in your hotel lobby may entice a guest to upgrade their room or book a massage at your spa. Guests can do a live walkthrough of the room they are choosing before their purchase!

It's not uncommon to find an LED screen in modern conference rooms, but a video wall further elevates your presentation. Share your PowerPoint slides, as well as motion graphics and videos. The multiple screens easily expand the viewing range. However, don't feel limited to one display. If you have a chart, graph, or file to share, keep it up in the left-hand row of screens for reference—then give your presentation in

the right-hand row of screens. Add to office conference rooms, large presentation spaces, and performance venues as a modern upgrade. Video walls can be used to stream live TV and events, and easily show them all at the same time. For example, a sports bar might play multiple baseball games or college football games that are on at the same time. Or stream larger events such as the Olympics or soccer playoffs. Or to create a gigantic screen for the Super Bowl. Since audio isn't required, noise isn't of concern when multiple games are on. Just be sure to turn captions on.

In addition to art installations, consider using large LED displays to set the tone, mood, and to create an immersive experience. For example, cover one of the walls in your office relaxation room with wall-to-wall digital displays. Then allow employees to choose between different natural settings, such as a rainforest, crashing waves, sunrise, scuba diving, or an ariel view of a mountain range. Include surround sound for a full-body experience. Or work it into your interior and lighting design to create a unique look in your home, office, or business—that you can alternate any time you want to change the mood of a room.

If you're an avid gamer or will be hosting a gaming competition or event, consider adding a video wall. Your wall can display multiple live gamers at once or can be used to create one life-size game—or alternate between the two. If you're using multiple screens at a gaming competition, you can dedicate one or two screens to upcoming scores, another to upcoming competitors, and another for updates.

Large gatherings are becoming more popular around the world. Guest speakers, important figures and visiting clergy can be displayed on the big screen for your entire congregation to see! With multiple screens, you can communicate multiple messages to your church members. Have a large main screen displaying the speaker, while two auxiliary screens can display what page from the bible he/she is reading from and a psalm or quote to take away from the message.

Large Video Walls for Churches are a great way to keep the kids entertained and enthralled in the message of the week!

As you can see, your video wall options are endless. Don't feel limited to just one of the options above, as you may utilize your digital display in a variety of ways. Maybe it greets your employees in the morning, displays custom art during office hours, and sends everyone off with an uplifting goodbye—and a few reminders for what's on the schedule tomorrow.

Maybe you want to display what the weather is like outside, or just constantly have its ambiance displaying cheery, sunny weather.

Or your spa video wall can alternate between your services and highlighting your amenities. Be sure to stay on your service and price list long enough to read from top to bottom.

- SMD is built with nothing but high quality components and a meticulous attention to detail. The result? A stunning Large Indoor LED Video Wall display that your audience will love.
- Everyone's needs are different. Choose from 1.53MM to 10 MM pixel pitch.
- Create the right size, quickly and easily

TRADE SHOW DISPLAY TECHNOLOGY

Your single source for dynamic trade show LED Displays. We know trade shows are a huge expense to a lot of businesses and making an impact on the show floor is key to a successful show.

We have extensive experience working with all type of clients including those that have no booth design or builder, all the way up to working with clients just a few months out from their event. We work with your builder to seamlessly add LED Video Displays rentals and purchases that add impact to make your booth stand out from the competition.

Our technical sales team works with you to uncover your individual needs and develop the perfect trade show LED display solution for your project. We help you maximize your display to help show off testimonials, your company's work, create interactivity, and be creative in your LED deployment. From start to finish, we will guide you through every step of the process to ensure your trade show is successful, your implementation is seamless, and operation is thoroughly explained.

Whether your design is already established, or you're just starting, our technical sales team can help come up with a LED video display system that fits your need. We work with a variety of trade show booth design and build companies that can help incorporate a digital experience into your booth.

Anyone can put a large LED screen in a trade show booth, but much more goes into adding LED Display technology into your trade show concept. Each client gets a dedicated project manager to help make sure your vision is

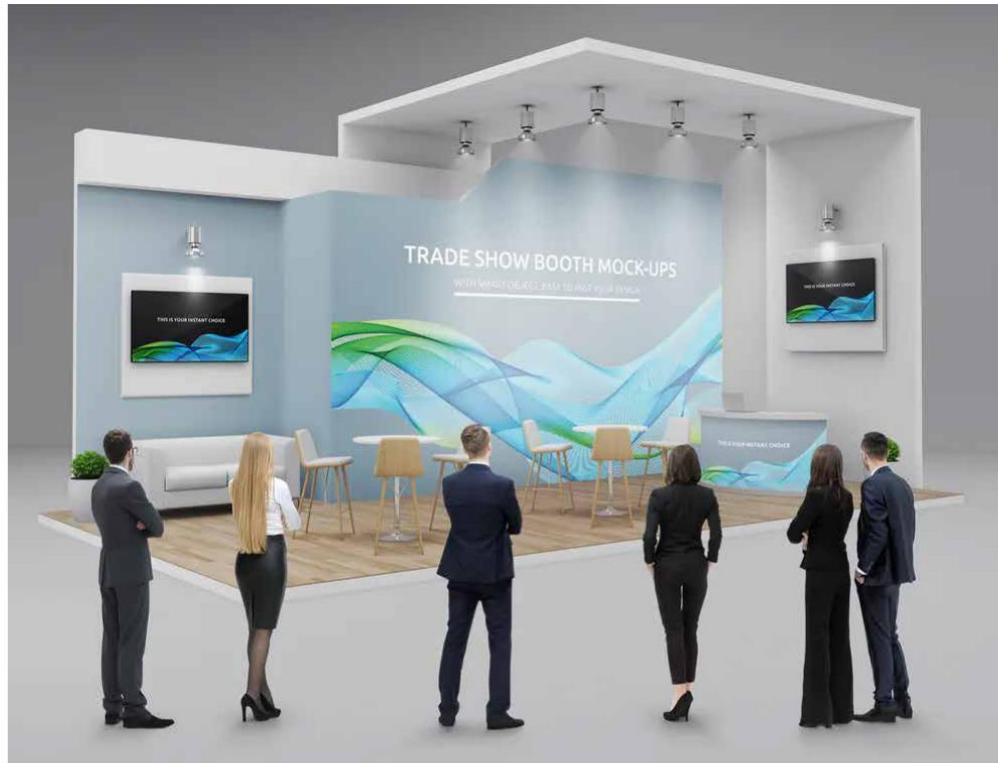

seamlessly integrated both pre show, during, and post show ensuring no surprises throughout the process.

Our team has extensive experience dealing with most of the world's largest convention centers and trade show services companies. On site we can help manage the full setup and teardown, as well as help maximize your screen for optimal playback to catch each potential customer.

At PixelFLEX, we understand that there may be a learning curve involved in transitioning to LED display technology. That's why we offer 24/7 Technical Support, as well as on site tech services to guarantee your show goes flawlessly.

Indoor Signs for Concerts, Trade Shows and Exhibition Halls

Large format display

Trade show LED display solutions consist of high resolution, large format displays usually used to show customers your work or display product demonstrations and learning opportunities. Our products give you the freedom to display whatever content that gives you the edge over your competition.

We understand that trade shows are a large investment to each company that exhibits. Often times ariel rigging of LED displays is not a feasible option financially or logisitcally. No matter the size of your booth space, our team can help come up with a LED wall solution that fits your creative vision and still give you visual impact that makes you stand out from the crowd. Creating an unforgettable first impression is key to winning a loyal customer, and the right digital experience can significantly impact a customer's spending.

CHANNEL LETTER SIGNS

Channel letter signs are an impactful signage choice. They are 3-D letter signs that are dynamic, eye-catching, and sure to attract customers to your client's store. The letters are bold, individually-lit, and individually-built to ensure the most visibility. The Xtreme Outerwear sign below is an example of front/back-lit channel letters.

Channel letter signs are eye-catching and professional, which is why many store owners choose them. You can see channel letter signs used by national brands and chains, because

they have an effective component of a brand awareness program. That's why channel letter signage is a common choice for grocery stores, restaurants, and retailers seeking to enhance brand recognition.

Channel letter signs have "stopping power," which is what most clients want. If your client's business is located on a busy street or in a popular shopping center, they'll want to stand out from the crowd. Give them the benefit of a sign that attracts thousands more impressions.

state-of-the-art equipment to precisely produce our channel letters. This ensures the quality, durability, and appeal of our signage.

Channel Letter Sign Customization

Channel letter signage can be customized to fit your client's or your needs including most font, color, size, and design wishes. Your client can also select from a range of channel letter types to find the right fit for their store and budget.

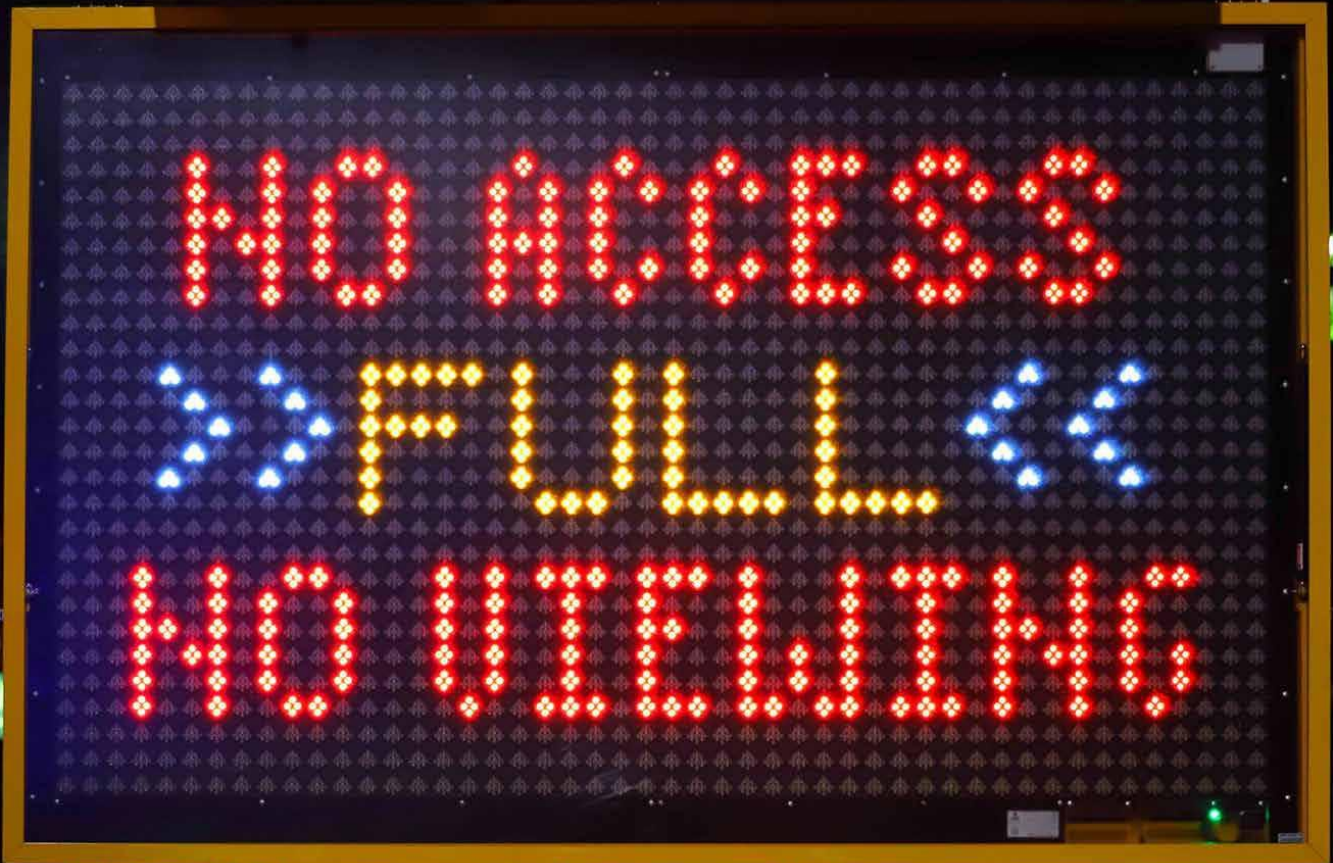

BOX SIGNS

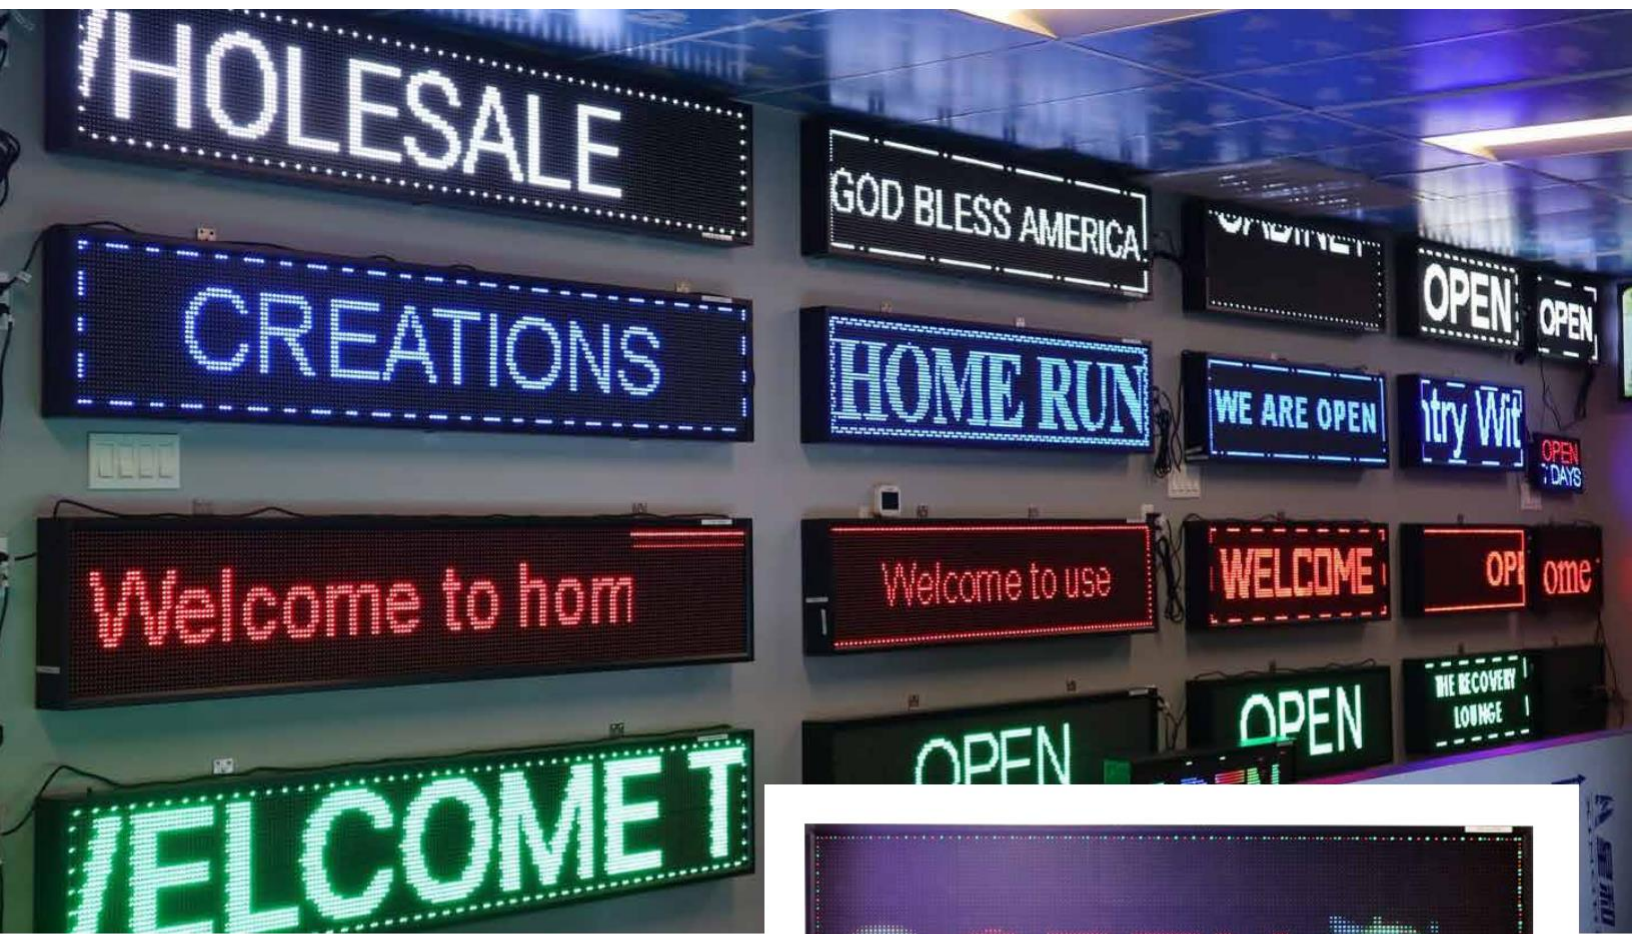

Outdoor light box signs are perfect for rugged outdoor applications, LED illumination combined with heavy duty weather resistant materials. You can apply your own graphics or we can supply a custom printed graphic with your branding.

CUSTOMIZED NEON SIGNS

Neon signs, by definition, are glass tubes filled with an inert gas such as Neon or Argon. When these glass tubes are subjected to high voltage it makes the gas glow inside the tubes producing a cool warm glow. Typically neon signs are used for advertising displays in hotels, bars and other entertainment venues. Today neon signs are more prominent than ever before. The most popular being Neon Open Signs and Neon Beer Signs; the bright glow of neon will surely draw attention in any setting.

Every time you look around, you find yourself surrounded with hundreds of messages, advertising efforts and other ways of distraction. On this digital age, we still trust our eyes, and Custom Neon Signs are the best way to capture your potential customers attention. We understand you're looking around for the best way to increase your customer base, and to spread your message across the board. SIGN experts will work with you to make sure your Custom Neon sign fit your needs. Bright Neon Signs specializes in custom neon signs, to

give your Neon Sign the flare and high-end finish touch you are looking for. Use our Neon and LED Lights to send the perfect message. We always go the extra mile, to turn your idea into "Neon Reality Signs".

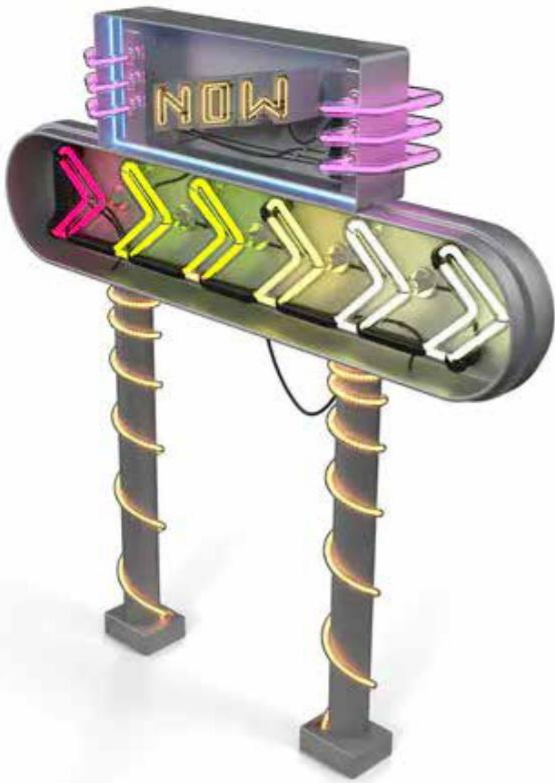

Every business needs an identity which is why owners spend a small fortune on ad agencies to create their brand. From the logo to the marketing materials, every business demands attention. Advertising is not cheap in today's hustle and bustle. TV spots, radio, newspaper and yellow page ads cost tons of money and it never ends. Month after month of spending can add thousands to your budget and what's it for? In the end, it doesn't get noticed. You can do this with a custom neon sign that features your brand in neon lights! Not only that but a custom neon sign can draw more attention, increase traffic and its only one price, one time. A custom neon sign will last you up to 5+ years and deliver more bang for your buck than any other form of media. Design your own or choose from 100+ custom neon sign designs.

Now **We are** bringing LED neon signs, which are cheaper, build to last, more brighter and much much more.
